

## PRESS RELEASE

29-August 2008

### **Rosslyn Analytics announces Contract Management and Compliance Monitoring as part of Spend Analysis for Global Data Services.**

London, 29-August 2008 – Rosslyn Analytics today released Version 4.1 of RA.Pid<sup>®</sup>, Rosslyn Analytics Spend Analytics and Intelligence tool, which adds Contract Management, Repository and Compliance features to its industry leading Global Data Services technology. Rosslyn Analytics has already signed up a number of global companies for its new technology including Navigant Consulting, Inc. “Being able to categorize all spend data and check compliance using Contract Management within the RA.Pid<sup>®</sup> tool is critical to the success of our sourcing programs.” says Sue Miller, Director of Procurement for Navigant Consulting.

Rosslyn Analytics Ltd is a leading supplier of business intelligence solutions and cost reduction services, specializing in “procure to pay” spend analysis. Rosslyn Analytics currently manages over \$70B in spend data for some of the largest global enterprises

Rosslyn’s flagship product is RA.Pid<sup>®</sup>, a spend visibility and business intelligence platform with the following features that define it as a generation ahead of other solutions:

- Web based open architecture with minimal effect (only network access and data extraction) on IT or existing ERP platforms
- Ability to access multiple disparate data sources from many business units/divisions and provide a single all encompassing analysis of expenditure. In addition, this feature allows for a dynamic environment capable of responding quickly to any change in data source.
- RA.Pid<sup>®</sup> bores down to the 3<sup>d</sup> and 4<sup>th</sup> level integrating AP, Purchasing and GL detail into a comprehensive three dimensional analysis. RA.Pid<sup>®</sup> then enriches the data with comprehensive statistical analysis, KPIs and benchmarking for all manager and executive stakeholders.

This proves invaluable to companies with de-centralized procurement and AP functions; and/or organizations with multiple divisions/business units.
